

# Lingua Fences

For two or more players.

Take turns writing words left to right or top to bottom.

One word per player per turn.

Any two adjacent letters must be a part of one valid word.

Writing the word to enclose a region on all sides awards that player points equal to the number of empty squares within.

You may not write inside an already enclosed area.

Players may pass on their turn.

The game finishes when all players pass one after another.

The player with the most points is the winner.
